Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The subject matter of claim 1 is consequently novel (PCT Article 33(2)).

The advantage of this feature can be regarded as the fact that, since the level of overpressure is constant, it is relatively easy to maintain a constant flow rate through the measuring device.

On the basis of this non-obvious solution to a technical problem, the subject matter of claim 1 is considered inventive (PCT Article 33(3)).

2. Dependent claims

Claims 2-10 are dependent on claim 1 and, in consequence, likewise satisfy the requirements of the PCT in respect of novelty and inventive step.
